Deadline for manuscript
submissions:

31 December 2020

This Special Issue on ‘Advances in Parvovirus Research 2020’ is associated to the conference “XVIII International Parvovirus Workshop” which will be held in Rimini, Italy, 9–12 June 2020 (<https://www.mdpi.com/journal/viruses/events/11146>). The international workshops dedicated to parvoviruses, first held in 1985, are events strictly centered on all aspects of parvovirus research and provide excellent opportunities to focus the research topics in this area.

The aim of this Special Issue of *Viruses* is to offer an opportunity to collect the newest contributions in the field of parvovirus research. Evolution, structural biology, viral replication, virus–host interaction, pathogenesis and immunity, clinical virology of medical and veterinarian relevance, gene therapy, and viral oncotherapy are a selection of the topics that will be addressed during the conference, as well as being of general interest to a wider audience.

Symposium participants, as well as all researchers working in the field, are cordially invited to contribute original research papers or propose reviews to this Special Issue of *Viruses*.

Message from the Editor-in-Chief

- *Viruses* (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the **Science Citation Index Expanded** (Web of Science), **MEDLINE** (PubMed) and other databases. Full-text available in PubMed Central.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2019).
